Introduction

Innovation and commitment

Driven by a constant scientific innovation approach and quality values, trust and proximity, we are known for placing the patient at the heart of our commitment. Our leading solutions for Interventional Urology make it easier for you to practice medicine.

For more than 120 years, and by working together with surgeons, we have initiated scientific and therapeutic advances of the highest order. Our expertise and the high quality of our industrial processes contribute to offering you approved medical materials worldwide.

Our solutions to transform patient care

The range of products has been entirely designed to make patients' lives easier.

- Endourology: a wide range of disposable products for stone management like Dormia® stone extractors, Ureteral stents, Access sheath (Retrace®) and guidewires. We have extended our line with an innovative digital solution to remove ureteral stents in one step: Isiris® α. The product is a single use flexible cystoscope with an integrated grasper.
- Women's Health: slings (Altis®, Aris®), and lightweight meshes (Restorelle®), to treat stress urinary incontinence and pelvic organ prolapses.
- Men's Health: male sling (Virtue®), inflatable penile implants (Titan® Touch), as well as malleable implants (Genesis®) to treat erectile dysfunction.
- Specialty Intervention: a wide range of drains and a suction/irrigation device for laparoscopy (Elefant®). Disposable devices related to the handling of prostatic disorders: prostatic catheters (X-Flow®, Prostaflow®), post operative bags (Cysto-Care®), bladder evacuator; and also addressing bladder and suprapubic drainage, urethral strictures, voiding dysfunctions, bladder outflow obstruction and other urological conditions (Cystodrain®).

A trusted partner at your side

Because your patients have specific needs and your expectations are demanding, customer service and sales representatives are available whenever you need them, to help you find the right solutions to your specific requirements.

Together, we can make life easier for patients with intimate healthcare needs

Synopsis

Urology

- 1 • Endourology
- 2 • Percutaneous access
- 3 • Urinary Diversion
- 4 • Connectors and spigot
- 5 • Lower urinary tract
- 6 • Organ procurement

Men's Health

- 1 • Erectile dysfunction
- 2 • Male Urinary Incontinence

Urodynamics

- 1 • Urethrocystometry
- 2 • Cystometry
- 3 • Urethral pressure
- 4 • Abdominal pressure
- 5 • Line and accessories

Women's Health

- 1 • Stress Urinary Incontinence
- 2 • Pelvic Organ Prolapse

Surgery

- 1 • Laparoscopic surgery
- 2 • Surgical drainage
- 3 • Pezzet - Malécot catheters
- 4 • Digestive surgery
- 5 • Miscellaneous

Dormia No-Tip

Nitinol • 4 twisted wires.

- Individually packaged • Sterile • Detachable handle.

REF.	Ch/Fr	Length	Basket size
EXN434	3	90cm	14mm

Designed for semi-rigid and rigid ureteroscopy.

Nitinol • 4 round wires.

- Individually packaged • Sterile • Detachable handle.

REF.	Ch/Fr	Length	Basket size
EXN734	2.2	120cm	11mm
EXN934	1.5	120cm	9mm

Designed for flexible, semi-rigid and rigid ureteroscopy.

Supplied with a waterproof connector (Tuohy-Borst).

Dormia N.stone

Nitinol • 4 helical wires.

- Individually packaged • Sterile • Detachable handle.

REF.	Ch/Fr	Length	Basket size
EXT224	4	90cm	15mm

ReTrace

Ureteral access sheaths

An innovative device with unique features

- Radiopaque ring.
- Hydro-coated reinforced sheath.
- Compatible with a 0.038" stiff guidewire.
- **Individually packaged** • Sterile.

Single wire concept: the working guidewire turns into a safety wire.

Flexible tip concept: designed to respect the anatomy and prevent ureteral injuries.

- Connector : ergonomic shape.

K-Box

The new generation training model

Unique 3D model for flexible ureteroscopy simulation and training.

It allows to learn :

- To manipulate the scope.
- To manipulate the scope with single use devices as baskets to catch and relocate stones.
- To perform step by step techniques.
- To use Holmium YAG in the different settings.

REF.

000PKBOX01

Imajin

Silicone double loop ureteral stents

The remarkable biocompatibility and flexibility of silicone makes it the material of choice for long-term implantation: improved patient comfort and less encrustation material compared to Polyurethane.

Duration of implantation: up to 12 months.

- **Kit composition:** each stent is supplied in a set with a pusher (simple or steerable) and with or without a guidewire depending on the model.

Ø Guide: 0.035".

Steerable pusher: with or without radiopaque ring.

- **Individually packaged** (with a guidewire) • Sterile.
- **Box of 5** (without a guidewire) • Sterile.

1.4. Double loop ureteral stents

Duration of
implantation: up
to 12 months.

Biosoft duo

Multi-length Hydro-Coated ureteral stents

Produced by coextrusion of a flexible material and a rigid material, Biosoft duo was designed for easy insertion, while retaining great flexibility for the patient comfort.

- **Kit composition:** each stent is supplied in a set with a pusher (simple or steerable) and a guidewire.
 $\emptyset$ Guide: 0.035".
Steerable pusher: with radiopaque ring.
- **Individually packaged** • Sterile.

Kits with
simple pusher

			O/O
Ch/Fr Stent	Ch/Fr Pusher	Length Pusher	Fixed core guidewire
4.8	4.8	75cm	BNGA58
6	6	40cm	BNGA68
7	7	40cm	BNGA78

Kits with
steerable pusher

Vortek Tumor stents

Without eyes on the straight section

The inner layer is reinforced compared to the standard Vortek ureteral stent. It allows passing through stricture and the stiffness of material offers an excellent resistance to compression.

- **Kit composition:** each stent is supplied in a set with a steerable pusher and a guidewire.
Ø Guide: 0.035" (hydrophilic nitinol guidewire).
- **Individually packaged** • Sterile.

RF3017	30	17cm
RF3019	30	19cm

2 • PERCUTANEOUS ACCESS

2.2. Percutaneous nephrostomy accessories

J and Malecot catheters

For percutaneous drainage of the renal cavities.

- Box of 5 • Sterile.

J catheters

J catheters are supplied with sleeve + 1 Luer-lock stopcock and PVC connector tubing.

	Without stylet			With stylet				
Ch/Fr	6	7	8	8	9	10	12	14
REF.	RCJ006	RCJ007	RCJ008	RCJ108	RCJ109	RCJ110	RCJ112	RCJ114

Length: without connector: 27cm except for RCJ114: 30cm.

Malecot catheters

Malecot catheter is supplied with sleeve + 1 Luer-lock stopcock and PVC connector tubing. Expect RCM016/18/20

	With stylet						
Ch/Fr	8	10	12	14	16	18	20
REF.	RCM008	RCM010	RCM012	RCM014	RCM016	RCM018	RCM020

Length: without connector 36cm except 34cm for RCM008 and RCM016/18/20 .

Malecot catheters with a re-entry tip

	With stylet			
Ch/Fr	14	16	18	20
REF.	AE5114	AE5116	AE5118	AE5120

Length: 35cm.

Length with the re-entry tip: 55cm.

Balloon catheters in silicone

For increased comfort during drainage.

- All silicone for biocompatibility and patient comfort.
- Radiopaque line helps to see product on X-Ray.
- Box of 10 • Sterile.

2 • PERCUTANEOUS ACCESS

2.3. Direct puncture

Set with J catheter

Percutaneous set. Each component of the kit is supplied in the same peel pouch.

- **Kit composition:**
 - Chiba needle 18G.
 - Seldinger guidewire 0.038".
 - 1 set of dilators depending on the catheter size.
 - Vortek J catheter with stylet. Length: 29cm (except RJE114: 32.5 cm)
- **Box of 5** • Sterile.

Body 20 Ch/Fr, supplied with insertion kit.

Graduated measuring catheter	
REF.	AE1900

Latex balloon.

5 • LOWER URINARY TRACT

5.4. Prostatic and urethral stents

Diabolo

Stent for reversible sphincterotomy in patients with Detrusor Sphincter Dyssynergia.

- Tight coils: no tissue ingrowth - easily removable.
- Wide base: low risk of migration.
- Large internal diameter: good drainage of urine.
- Ancillary.
- **Individually packaged** • Sterile.

Diabolo	Material: Phynox
REF.	A22101

BoNee

Needle for bladder injection.

- For Injection inside the bladder muscle.
- Short tip (4 mm).
- 22G needle, 5Ch/Fr.
- Protection cap on the needle tip.
- Pointer stop: Reduce the bladder perforation risk.
- Flexible body.
- Box of 1 or 5 • Sterile.

TOUCH

Titan Touch Inflatable penile implant

3-pieces inflatable penile implant with hydrophilic coating and deflate button pump design.

- Touch pump: one touch of the deflate pads allows for easy deflation of the device.
- The Bioflex® material of the cylinders allows for unmatched cylinder strength and rigidity.
- Reduced risk of auto-inflation with Lock-out™ valve on the reservoir.
- Hydrophilic coating.
- Zero Degree angle proximal base input tubing for ease of surgical placement.
- Soft molded tip designed for suitable anatomic positioning.
- Individually packaged (pairs) • Sterile.

INCH: abbreviation " = 25,4mm

Guarantee and conditions of use

Coloplast Manufacturing France – Guarantee and conditions of use

Without prejudice to your legal guarantee against the consequences of defects or hidden defects in the products, our commercial guarantee shall apply under the following conditions:

This guarantee shall apply to the products mentioned in this catalogue except for Men's Health penile implants and their components.

Coloplast shall guarantee the products against defects in manufacturing workmanship and against defects in materials for a maximum of three (3) months from the date of delivery (the "Warranty Period"), with the onus being on the Purchaser to prove the said defects.

Coloplast's guarantee shall be strictly limited to the products supplied and shall have as its sole effect the repair or replacement at Coloplast's expense and in its workshops of those products rendered unusable as a result of defects. This is subject to Coloplast receiving written notice of the defect within ten (10) days from the date the defect was or should have been discovered by the Purchaser, within the Warranty Period. The return of the products must be done within the deadline communicated by Coloplast. Any return not respecting these conditions, cannot be the subject of an exchange. Products returned and replaced free of charge shall remain the property of Coloplast.

The guarantee shall not apply to replacements or repairs resulting from normal wear and tear of the products, to deterioration or accidents due to negligence, to any failure to respect the handling, transportation, storage or sterilization conditions, or to any failure to monitor, maintain or use the products correctly. EXCEPT AS STATED IN THIS GUARANTEE, THERE ARE NO OTHER EXPRESS, IMPLIED OR STATUTORY WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

This guarantee shall not extend to any consequential or any other loss or indirect damage that may result from using a Coloplast product that has a manufacturing or material defect, whether for breach of any guarantee or warranty, for breach of any other term, or for ordinary negligence, unless it is shown from the circumstances of the defect that Coloplast has been guilty of gross negligence. The provisions of the United Nations Convention on the International Sale of Goods are expressly excluded from any purchase or sales contract of Coloplast products. Except as set forth in this paragraph, no compensation shall be payable by way of damages for any reason whatsoever. The storage conditions of the products shall be the sole responsibility of the Purchaser. We recommend that the products be stored in their original packaging with this packaging intact, away from light in a dry place, and at an ambient temperature.

The fact that a product is mentioned in this catalogue does not necessarily mean that it can be supplied. Committed to continually improving product quality, Coloplast reserves the right to make changes at any time, without notice, to its products, their specifications, packaging and presence in its range.

The purchase or use of our products implies acceptance of the general conditions of sale set out in the price list.

Material used

Coloplast uses various types of raw materials, depending on the various diagnostic or therapeutic indications for its devices.

The biocompatibility of the medical devices is in accordance to EN ISO 10993-1: 2009 + AC 2010 standard.

Before being used in manufacturing, raw materials are controlled in our laboratories batch by batch, using the control methods defined by our internal procedure.

All materials and components used by Coloplast are controlled and used in accordance with procedures and the requirements of standard EN ISO 13485: 2012 + AC: 2016

The manufacturing processes depend on the material and include extrusion, injection or compression-molding, assembly and soaking.

We use three main types of material:

- Silicones
- Latex
- Thermoplastics: Vortek®, Biosoft®, Neoplex, Polyamide, PVC and Polyurethane.

SILICONE: this is a flexible material with optimum biocompatibility. Silicone comes in different degrees of rigidity; it may be transparent, may contain radiopaque lines and may be opaque to X-rays.

After use, it degrades only to silica (sand) and water, with no chlorine or carbon derivatives. It is very stable over time.

VORTEK: An original formulation designed by Coloplast. The material is biocompatible; it comes in different degrees of rigidity and is opaque to X-rays. Mastery of the co-extrusion of this material has made it possible to produce dual-hardness JJs which are rigid in contact with a guide wire to facilitate glide and assembly, while having a flexible exterior for patient comfort.

BIOSOFT: a flexible biocompatible polymer which is particularly well tolerated by patients.

NEOPLEX: a specific formulation developed by Coloplast based on PVC and plasticizer.

POLYAMIDE (PA): particularly rigid material suitable for accessories such as funnels, tips, sheaths, etc.

PROLYPROPYLENE (PP): is a synthetic material made of macromolecules. It is low density and exhibits excellent mechanical properties over time, with a high level of chemical inertness and biocompatibility.

POLYVINYLCHLORIDE (PVC): a transparent polymer which may contain radiopaque lines and/or pigments.

It has been used for many years for the manufacture of various medical devices.

POLYURETHANE (PU): a material which does not contain plasticizer and which is very resistant, and with different range of elasticity available.

LATEX: a natural latex compound stabilised by vulcanisers and by hardeners used to induce rigidity; it comes in various degrees of hardness.

It has been used for many years because of its low cost and natural elasticity. It may be coated with various substances which do not modify its intrinsic properties. It may also be reinforced with a spiral wire to resist crushing and folding.

Latex components

Coloplast hereby confirms that the products listed below contain latex

Notes

Coloplast develops products and services that make life easier for people with very personal and private medical conditions. Working closely with the people who use our products, we create solutions that are sensitive to their special needs. We call this intimate healthcare.

Our business includes Ostomy Care, Continence Care, Wound and Skin Care and Interventional Urology.

We operate globally and employ about 11,000 employees.

Ostomy Care / Continence Care / Wound & Skin Care / Interventional Urology
